Definitions:

Hazard. A situation or thing that has the potential to cause harm to a person or equipment.

Risk. The possibility that harm (death, injury) might occur when exposed to a hazard.

Risk Control. Taking action to eliminate health and safety risks as far as is reasonably practicable, and if that is not possible, minimizing the risks as far as is reasonably practicable. Eliminating a hazard will also eliminate any risks associated with that hazard.

Consequence. The effects of either the risk or hazard.

Likelihood. The chance of in which the risk or hazard are likely to happen.
